by Kat Miller · Published September 22, 2016 · Updated August 31, 2020 You may not know this, but MuggleNet has over 70 volunteers helping us become the world's #1 Harry Potter website. We work hard together, from blogging and listicles, to organizing online events and IRL. We are also, as you can imagine, playing hard together. We all get along pretty well, and when something big touches the fandom - as the Patronus test has finally become available on Pottermore - we geek out just as hard as you do. This list may never be completed, but with a variety of results our employees received, we knew we had to put a list together. If you don't see your Patronus above, please comment below, and we'll add it to the list! Tags: JK Rowling Patronus Pottermore quiz JK Rowling pottermore patronus quiz does not disappoint. If you are wondering which animal you can get, we have a complete Patron list. It took a long wait, but the official Patronus test on WizardingWorld.com (formerly known as Pottermore) awarded our patience. Music, effects and animations increase the bar for personality puzzles. It's simply magical! Equally impressive was the number of animals in the Patronus test. All animals come with their own animation series, which may explain why Pottermore took so long to create the test. I personally would have enjoyed watching my Prance West Highland Terrier around the screen! It indicates there are many animals, both from the Muggle world and the Wizarding World (although the later is rare). Below, we've compiled a complete List of Patronus, so you can see all the options on the test. And if you're curious about what J.K. Rowling's patron is, it's another one! It's a :) - J.K. Rowling (@jk_rowling) September 22, 2016 Take the official test for yourself and for more Harry Potter fun, be sure to check out the Harry Potter MuggleCast Podcast! Complete pottermore patronus list of rare animals marked. Pottermore also told some people that their Patronus is unusual – we don't know if this means if animals are rare, or if it's just a little less common than other patronuses.
